**Sterilisation is proven to be the ONLY effective answer to reducing the number of unwanted puppies & strays.**

StreetLife is a non-profit association that organises and helps fund the sterilisation of dogs in the East Algarve to prevent more unwanted puppies and strays.

We support low-income families and shelters who rescue strays and abandoned dogs.

There are several shelters across the Algrave and they are overflowing with abandoned dogs, many of which come from local families.

StreetLife wants to reduce the number of litters in the first place through our programme of sterilisations. **Our Be Wise - Sterilise Campaign.**

**Be Wise Sterilise**

Litters of puppies from unsterilised pets are a particular problem because many pet owners will not have unplanned pregnancies terminated.

They prefer to dump the puppies in waste bins, cardboard boxes, plastic bags or at shelters to get rid of the problem.

Many pet owners do not sterilise their dogs because they simply cannot afford the veterinary costs involved, and so the problem continues.

Thousands of unwanted dogs are born each year, many of which end up abandoned and / or die of starvation or disease.

All of this because some owners do not sterilise their dogs. This is where StreetLife can help.

**Low cost sterilisations**

StreetLife subsidises the cost of sterilisations and microchips in situations where the normal cost is too high.

Money is raised through donations and fund-raising events.

StreetLife supports a few local dog shelters by sterilising their "house guests" before they are rehomed.

**ONE sterilisation can prevent 2,000+ dogs in four years & a scary 67,000 in 12 years!**

StreetLife relies on donations; we depend on the generosity and support of others.

Every donation makes a difference to the life of a local dog.

We are grateful for any support you give.

*Thank you*
